The Man with a Cigar

Case Summary

Client stated unusual things have been happening over last 6 months. Lights are on that client knows he has turned off. Oven timer buzzer going off randomly. He was playing guitar and felt something pushed it out of his hands. He and 3 friends were in a bedroom with the door open and heard what sounded like a very large bird flapping its wings in the next room. He went to check the sound and nothing was there. In February 2006 he witnessed a small ball of light traveling from behind the entertainment center and disappear behind a cardboard standup.

When he talked to his former roommate and asked if anything “weird” happened when she was living there, her reply was “Is the ghost turning things on?”

Client lives in part of home that was not a part of the original structure and has lived there for 2 ½ years. He reports seeing shadows out of the corner of his eye – movement in the kitchen.

Client reports that he went to the basement the week before the investigation and came upstairs to find the TV had turned on. He was also talking to his roommate about the “ghost” when the light in living turned out.

Roommate hears random noises around the house.

Scientific Findings

EMF Readings: There weren't that many oddities with the baselines. The only odd one was a spike of 2 in the bathroom where not electrical outlet was present. During the time that psychic impressions were received by our sensitives, the EMF reader spiked out at a 5. The highest readings were picked up under the coffee table at the time it was sensed “David” was there and at the times when “George” was in the

room around the chair across the room. There is an electrical outlet there, however during baseline it was not emitting unusual readings.

Temperature Readings: The temperature over most of the home was between 85 and 87 degrees and did not fluctuate. No cold spots were found.

Video: None

EVP (Electronic Voice Phenomena): EVPs were picked up. DVD of findings will be played at reveal.

Photographs: See Exhibit A

Exhibit A – Orb- Light Refraction

CMPS Conclusion

Although we were able to capture some kind of EVP's and there were strange noises, we could not definitely decipher them. There were strong psychic impressions but we do not include them in our conclusion because we cannot prove them scientifically. We did receive high EMF readings. However we did not capture any photos or video with which we can definitively prove a haunting.

The Central Massachusetts Paranormal Society cannot at this time state definitively this location is haunted. We would be happy to come back and investigate at any time paranormal activity picks up.

Personal Impressions

All that I experienced during this investigation was received through my gifts of being a Sensitive.

At first I did not encounter much and then Nancy began receiving information. As I allowed myself to tune in, I felt a tall male entity, he smelled like a Cigar, not a very nice man, one who wanted to possess or control.

Then the little boy who was very fearful of the older man, I saw him holding up his hands proclaiming no don't. Then entered the Boys mother who the coddled him and took him away.... during these times there were escalated EMF readings...

Additional impressions by contributing Investigator:

Nancy McMillan

When I first entered the apartment - a small two bedroom in a three floor apartment house, I felt nothing. We did the usual baseline readings and come up with no anomalies. We went dark and began our investigation. I was teamed with Chris and we began EVP work in the client's bedroom. We sat in silence for a long time but I felt nothing. Then suddenly I was drawn into the living room. I went into the room alone and sat quietly on the chair. I began to get impressions. The first that came through was of a very tall man. I described him as looking a bit like Abe Lincoln. His name was George Thomas and he gave the date of 1857. While I connected with George I had an overwhelmingly uneasy feeling. This was not a nice man. As I sat there I was joined by Melanie, Chris and Suzette. As I spoke with George, Melanie picked up some high EMF readings in the area. She also sensed him and smelled cigar smoke. He became very angry when I asked what he was doing in the town we were in. He insisted he was not there but in Weymouth.

Shortly afterward another spirit, a young boy named David came in. He was about 8-10 year old. He was gave me a different date. He is the one who turns the

television on and off and plays little pranks. He doesn't mean to bother anyone. He is simply curious. He is terrified of George. George seems to be the one bringing him in, almost enticing him with these new playthings, but once David comes in George menaces him in some way. When George came back, David became so terrified that he hid under the table. I could see him on his knees, hugging his arms to his chest, under the coffee table. At that time the EMF reader went crazy under the table. I could feel David's terror and couldn't disconnect with him.

A third entity entered by the name of Caroline. She is David's mother. As soon as she came in, he came out from under the table and ran to her. The image I had was her holding him in her arms, hiding his face against her chest, protecting him. They left together and when they did I was able to disconnect with him. Both Carolina and David's last name appears to be George yet I didn't sense any kind of blood relation. I believe they are related by marriage.

Case Tip: Developing your sensitivity

Your intuition is your guide to knowledge and truth. Accessing and using your intuition enhances your everyday life. But you can become more in tune with yourself and the world around you by [honing your intuition, increasing your sensitivity, and developing your psychic awareness](#). A simple way to start your journey is to set aside some quite time every day, even 5 minutes will do. During this time, let your mind be receptive to the unseen world around you. Over time, you will be amazed at the sights and sounds you will encounter on the other side.
